Park User Statistics

PEAK SEASON SUMMARY

Alberta
RECREATION AND PARKS
Provincial Parks Service

PREFACE

This report presents a summary of Park User Statistics for the 1989 Peak Season. The Park User Statistics reporting structure also includes the production of two other types of documents:

1. The Monthly Camping Statistics Summaries produced throughout the peak season, and;
2. The Fiscal Year Summary available in approximately June of each year.

With this reporting structure, it is hoped that Park User Statistics are made available at a time appropriate to budget preparation cycles, manpower planning, program planning, monitoring and evaluation.

The Provincial Parks Service of Alberta Recreation and Parks collects four basic types of visitation information:

1. Camping Use Statistics - collected through permit sales, reasonable estimates and camper surveys;
2. Day Use Statistics - collected through Automatic Traffic Counter readings and traffic surveys;
3. Group Camping Use Statistics - collected through permit sales; and,
4. Fixed Roof Accommodation Use Statistics (Kananaskis Country) - collected through receipts.

The data collection systems associated with these types of visitation statistics are discussed in detail in the Introduction Section.

Visitation information contained herein is reported at the management unit level for Provincial Parks, Sub-Districts within Kananaskis Country, and Provincial Recreation Areas (P.R.A.'s). Appropriate user statistics for overnight and day use are included. "Area" level statistics (i.e. individual campgrounds, day use areas, group use areas, fixed roof accommodation facilities), although not reported in this summary, are available upon request.

Alberta Recreation and Parks is pleased to provide for your use, the fourth annual "Park User Statistics - Peak Season Summary" report. Inquiries requiring further explanation of the methodology are welcomed, and should be directed to Roy Finzel at 427-2968.

90-05767/4

INTRODUCTION

Implementation of the revised Park User Statistics Collection (P.U.S.C.) System, following an extensive revision study, occurred in April 1986. This report presents Park User Statistics for the period of April 1, 1989 to September 30, 1989. Information is presented for all Provincial Parks, Sub-Districts within Kananaskis Country and Provincial Recreation Areas outside of Kananaskis Country at the "management unit" level. Sub-management unit level statistics (E.g. individual campground statistics) are not reported, but are available upon request.

Tables summarizing camping, day use, group use and fixed roof accommodation use statistics are included in this report. Brief descriptions of the data collection methodologies used for each category of use statistics are presented below.

Camping Statistics

Camping statistics are based primarily upon information obtained from camping permits. These permits are issued via two systems: the Standard Camping Permit and the Self-Registration Permit (envelope) systems. In the absence of permit sales (E.g. some campgrounds in the off-season), reasonable estimates of camping use are provided by park staff. Information collected through these systems is summarized and transferred from the Parks to Edmonton via the Park User Statistics Summary (P.U.S.S.) sheet to record monthly camping statistics. This includes data on occupied campsite nights, turnaways, and site closures.

The **Standard Camping Permit** and associated periodic surveys provide information on occupied campsite nights, average camping party size and accommodation unit usage. This information enables calculation of individual camper nights and accommodation unit nights (see Glossary of Terms). Occupied campsite nights are based on the premise that a site is considered occupied when a permit has been issued and that site is occupied by the permittee and at least one camping accommodation unit. Campground turnaways are recorded each time a camping party is personally turned away because no campsites were available. This information is then recorded on monthly P.U.S.S. sheets and is presented in this report.

Self-Registration Permits also provide statistics on occupied campsite nights, but require a periodic self-registration camper survey to provide data on camping party size and accommodation unit usage. Turnaway counts by Park staff are not always made owing to the self-administered nature of registration.

By way of a **caution**, it is important to note that in any self- registration system, non-compliance (i.e. campers not voluntarily completing a permit and submitting money) can adversely affect the reliability of estimates of camping use. This problem is normally accounted for by compliance checks conducted by the rangers and the inclusion of non-complying occupied campsite night figures. For Provincial Recreation Areas however, where patrols cannot always be made daily, non-compliance adjustments may be low resulting in an under-estimation of camping use.

Campground occupancy data are determined from an analysis of: (1) campground capacity, (2) the number of weekday and weekend days in a specific month, (3) the number of sites affected by a closure per day, and (4) the total occupied campsite nights per month. Refer to the Glossary of Terms for the formulas used in calculating campground occupancy rates and average daily percent campground occupancies. In addition, overflow unit night figures are included in the occupancy data tables whenever appropriate.

Day Use Statistics

An evaluation of day use data collection procedures in 1981 concluded that the existing methodology was non-systematic and resulted in day use statistics which were not accurate. Consequently, a day use calibration program was instituted in the summer of 1983 and, since then, all provincial parks have been surveyed. This includes sub-districts within Kananaskis Country.

For sub-districts within Kananaskis Country and Provincial Parks, peak season day use statistics are now based on figures collected from automatic traffic counters. Adjustments to these figures include determining the ratio of day use vehicles to all other vehicles entering or exiting the park and mean party size. Both adjustment factors are obtained by a periodic (every four years) day use calibration survey. The day use calibration program involves the stopping of traffic on 20 randomly selected days during the peak season, to conduct a brief interview. Both this information and the daily vehicle counts are analyzed to yield estimates of day use visitation.

It is important to note a significant change to the day use statistics reported for Provincial Recreation Areas. For the majority of Provincial Recreation Areas outside of Kananaskis Country, day use statistics prior to 1989 were, for the most part, calculated using camping figures multiplied by the relative relationship between camping and day use. However, beginning in 1989, day use statistics for all these Provincial Recreation Areas are based upon Automatic Traffic Counters readings as in Provincial Parks.

The new methodology adjusts traffic counts adjusted for camper traffic (determined from permit sales and taking into consideration non-compliance and multiple entries and exits) and non-recreational vehicles (from records of park staff) to yield estimates of day use visitation. This approach to day use estimation is referred to as the Residual Method. Due to the change in the collection methodologies at Provincial Recreation Areas, no historical day use comparison is provided prior to the implementation of the residual method.

Under certain circumstances, staffing does not always allow for regular reading of traffic counters on Mondays and Fridays, which is required in order to divide reported day use statistics into weekends and weekdays. In these instances, all monthly day use statistics have arbitrarily been categorized and reported as weekend day use.

Group Use Statistics

A standard system for collecting group camping use statistics was implemented in 1986. No prior statistics are available. Currently, the group use permit system enables collection of information pertaining to group camping unit nights, individual group camper nights, and occupancy. A survey component of the group use permit provides the average number of people in a group unit. This figure is required to calculate individual group camper nights.

Fixed Roof Accommodation Use Statistics

Occupied room nights and people nights are derived from receipts and summarized and forwarded from the Parks to Edmonton via the Park User Statistics Summary (P.U.S.S.) sheet.

An appendix has been included in this report to complete the information requirements relevant to the reporting of Park User Statistics.

GLOSSARY OF TERMS

CAMPING

ACCOMMODATION UNIT NIGHTS:	Average number of accommodation units per campsite X the number of occupied campsite nights.
AVERAGE CAMPING PARTY SIZE:	Average number of people per occupied campsite. This is determined for each area by a periodic survey of camping permits.
AVERAGE DAILY (WEEKEND/ WEEKDAY/TOTAL) PERCENT CAMPGROUND OCCUPANCY:	(Total Occupied Campsite Nights For a Specified Time Period) **Divided** by ((The Sum of Campground Capacity Per Given Day) **Minus** (The # of Sites Affected by Closure Per Given Day)) **Multiplied** by (The Number of Days).
CAMPGROUND OCCUPANCY RATE: (REPORTED AS "NUMBER OF NIGHTS AT PERCENT OCCUPANCY")	(Occupied Campsite Nights For a Given Day) **Divided** by (Campground Capacity For a Given Day) **Minus** (The Number of Sites Affected by Closure For a Given Day). The result is **Multiplied** by 100. Note: Sum the number of nights that report a specified range of percent occupancies.
CAMPING ACCOMMODATION UNIT:	A tent, a tent-trailer, a travel-trailer, a motorhome, a camperized van, or a truck camper.
CAMPING PARTY SIZE:	The total number of people present on an occupied site (regardless of the number of camping accommodation units occupying a site).

... continued ...

GLOSSARY OF TERMS

GROUP AREA NIGHTS AVAILABLE:	((Number of Group Use Areas) **Multiplied** by (Nights Per Month)) **Minus** ((Group Areas Closed Per Month) **Multiplied** by (Nights Affected)).
GROUP AREA NIGHTS OCCUPIED:	Sum of the number of nights a group use area has been actually occupied over a specified period of time.
GROUP CAMPING UNIT NIGHT:	One camping accommodation unit in an area, designated as a group use area for one night.
INDIVIDUAL CAMPER NIGHTS:	Average camping party size X the number of occupied campsite nights.
OCCUPIED CAMPSITE NIGHT:	One site occupied for one night.
OCCUPIED CAMPSITE:	A site that is occupied by at least one camping accommodation unit.
OVERFLOW UNIT NIGHT:	One camping accommodation unit in an area designated as an overflow area for one night.
SITE NIGHTS AVAILABLE:	((Capacity) **Multiplied** by (Nights Per Month)) **Minus** ((Sites Closed Per Month) **Multiplied** by (Nights with Closed Sites)).
TOTAL OCCUPIED CAMPSITE NIGHTS:	The monthly or seasonal totals of the individual daily sums of occupied campsite nights.

... continued ...

GLOSSARY OF TERMS

TURNED AWAY PARTY:	A party which has been informed, by a park representative, that they cannot be accommodated on account of all available sites being occupied at a specified time.

DAY USE

AVERAGE DAY USE PARTY SIZE:	Average number of people associated with a vehicle entering a Provincial Park or Provincial Recreation area for one day or portion of one day without staying overnight. This is determined by a periodic survey of day users.
DAY USE PARTY VISIT:	A number of people in a vehicle entering a Provincial Park or Provincial Recreation area for one day or portion of one day without staying overnight. NOTE: In the case of "walk-in" day users, a party is considered to be one or more individuals who appear to enter the park together.
INDIVIDUAL DAY USERS:	Person(s) making a recreational visit to a Provincial Park or Provincial Recreation area for one day or portion of one day without staying overnight.

... continued ...

GLOSSARY OF TERMS

FIXED ROOF ACCOMMODATION USE

OCCUPIED ROOM NIGHT:	One room occupied for one night.
PEOPLE NIGHTS:	Average number of people per room X the number of occupied room nights.

Note:
- Occupied Campsite Night figures, prior to and including 1986, do not include Provincial Recreation Area use due to the incompatibility of collection methodologies.
- Occupied Campsite Night figures include Backcountry Camping.
- A system to calculate Group Unit Night figures was introduced in 1986.
- The 1986 Day Use Party Visit figure does not include either Kananaskis Country or Provincial Recreation Area visitation.
- Day Use Party Visit figures prior to 1986 are not reported at the Provincial level due to the phased implementation of a new collection methodology based upon traffic counters.

DAY USE PARTY VISITS		170355	164185	191755	256785	34

Note:
- Occupied Campsite Night figures, prior to and including 1986, do not include Provincial Recreation Area use due to the incompatibility of collection methodologies.
- A system to calculate Group Unit Night figures was introduced in 1986.
- The 1986 Day Use Party Visit figure does not include Provincial Recreation Area visitation.
- Day Use Party Visit figures prior to 1986 are not reported due to the phased implementation of a new collection methodology based upon traffic counters.

DAY USE PARTY VISITS		267982	274495	273000	241525	-12

Note:
- Occupied Campsite Night figures, prior to and including 1986, do not include Provincial Recreation Area use due to the incompatibility of collection methodologies.
- A system to calculate Group Unit Night figures was introduced in 1986.
- The 1986 Day Use Party Visit figure does not include Provincial Recreation Area visitation.
- Day Use Party Visit figures prior to 1986 are not reported due to the phased implementation of a new collection methodology based upon traffic counters.

DAY USE PARTY VISITS	122141	646891	682475	685310	691560	1

Note: - Occupied Campsite Night figures, prior to and including 1986, do not include Provincial Recreation Area use due to the incompatibility of collection methodologies.

- A system to calculate Group Unit Nights was introduced in 1986.

- The 1986 Day Use Party Visit figure does not include Provincial Recreation Area visitation.

- Day Use Party Visit figures prior to 1986 are not reported due to the phased implementation of a new collection methodology based upon traffic counters.

(CONTINUED)

EXPLANATION OF SYMBOLS

* - Rank order of management units is based on individual day users.
S.D. - Sub-District
P.R.A. - Provincial Recreation Areas

Notes: - Refer to individual park tables in text for factors influencing use.

- Day use statistics for several areas (IE. Calhoun Bay, Hoodoos, Horseshoe Canyon, Lundbreck Falls, Missawawi Lake, Park Lake, Tay River, Twelve Foot Davis, and Yarrow Creek) are not available and are therefore not included in the above table.

TABLE 5 **NUMBER OF DAY USE PARTIES AND INDIVIDUAL DAY USERS, BY MANAGEMENT UNIT: 1989 PEAK SEASON (CONTINUED).**

* RANK ORDER LISTING	MANAGEMENT UNITS	DAY USE PARTIES			INDIVIDUAL DAY USERS
		WEEKDAYS	WEEKENDS	TOTAL	
52.	Franchere Bay P.R.A.	2,500	4.275	6.775	16.938
